

THE COMPAQ TABLET PC TC1000 is a new slate-like computer that combines the simplicity of paper with the power of the PC to enable users to be more productive. By adding the convenience of handwriting recognition, the Compaq Tablet PC is able to work like a sheet of paper. Users are able to scribble notes or doodles straight onto the intuitive screen pad. The handwriting or drawings are captured as rich digital ink that can be shared immediately or saved for later. With the Compaq Tablet PC, users are able to simply annotate and update a document on the move and then wirelessly transmit the finished version. What's more, its high-resolution display makes it ideal for reading and rich multimedia applications.

Compaq Tablet PC TC1000

Powered by the Microsoft® Windows® XP Professional operating system, the Compaq Tablet PC TC1000 gives you speeds of up to 1GHz, breathtaking nVidia GeForce2Go graphics, incredible storage space of 30GB and up to five hours of battery life to meet the demanding needs of business professionals. All packed in a convenient, light and ergonomic form factor.

Undoubtedly, the Compaq Tablet PC offers unprecedented mobility and flexibility for business computing. While retaining the full power to run all existing Windows-based software applications, this form factor expands enterprise computing to address previously unmet needs such as the ability to take notes at meetings, annotate existing electronic documents and presentations, and read on screen easily. And with a high-resolution display and advanced Microsoft technologies, users can write and store information in their own handwritings. Handwritten notes can be shared via e-mail or easily converted to typed text for use in other Windows XP-compatible applications. The recognition of handwritten notes and instructions is designed to be as reliable as input from a keyboard or mouse is today.

By allowing users to input into their Compaq Tablet PC using only an electronic pen and a few buttons, rather than with a keyboard and a mouse, the Compaq Tablet PC will provide new opportunities and technology directions for the PC hardware and software communities.

RANGE OF SUPERIOR FEATURES

- **POWERED FOR HIGH PERFORMANCE AND ULTRA MOBILITY** The Compaq Tablet PC TC1000 is a Full-function PC powered by Microsoft® Window® XP Tablet PC Edition delivering high-performance and breathtaking graphics to meet the demanding needs of business professionals.
- **SEAMLESS CONNECTIVITY FROM MEETING ROOM TO OFFICE** Integrated wireless features to allow easy note taking and sharing wherever your business takes you. An innovative docking system provides easy transition from meetings back to the office.
- **SIMPLICITY OF PAPER WITH THE POWER OF PC** With high-resolution display and advanced Microsoft technologies, you can write and store information in your own handwriting and easily convert notes into typed text for use in other Windows XP-compatible applications.
- **WORKS LIKE A TABLET PC, NOTEBOOK PC AND DESKTOP PC** Works great as a Compaq Tablet PC in meetings, snaps on to keyboard easily, rotates into place and converts to a notebook PC or as a desktop PC once you get back to the office.
- **VERSATILE FORM FACTOR** The Compaq Tablet PC has the versatility of viewing or writing in portrait or landscape modes
- **DISCREET** Innovative form factor removes barrier in meeting rooms and allows users to write discreetly in places PCs don't usually go.
- **EXPANDABLE** Multibay features in the docking system allows for future expandability
