It will pop up the installation wizard page to click **"BT driver"** and choose installation according to your computer's operating system. Wait for a few seconds and click **"next"** to complete the installation.

2. Click the Bluetooth icon in the task bar and click **"add device"**. When the mobile phone of Bluetooth function is turned on and the computer will search for the Bluetooth information of mobile device. Click **"next"**, the computer side will have a verification code, click pair in the phone side. You could use normally with the Bluetooth function.

* If your PC has no CD-ROM, Please browse LB-LINK website to download driver:

Troubleshooting

After insert the Driver CD, the setup wizard does not pop up, what should I do?

1. Please open "Computer", and find the "B-link CD". Double click on "autorun.exe" to run it.
2. Make sure that the computer is configured to auto-play media, and that all devices can use auto-play.

If I installed the driver, but I still can't use the wireless USB N adapter, what should I do?

1. Try another USB port on the computer.
2. Make sure that the computer does not have a similar driver already installed, if so, uninstall the other driver, then plug in the wireless adapter again.
